FABA BEAN

CONTENTS

Contents

1 Introduction

- 1.1 Faba bean in Australia..... 1
- 1.2 Why grow faba bean? 2
 - 1.2.1 Weeds 2
 - 1.2.2 Disease 3
 - 1.2.3 Nitrogen 3
- 1.3 Key points for successfully growing faba bean 4
- 1.4 Plant physiology 5
 - 1.4.1 Suitable environments 6
- 1.5 Products and uses 6
 - 1.5.1 Human consumption 6
 - 1.5.2 Animal feed 6
- 1.6 Market 7
 - 1.6.1 Faba bean 7
 - 1.6.2 Broad bean 8
- 1.7 Faba bean research 9

2 Planning and paddock preparation

- Key points..... 1
- 2.1 Paddock selection 2
 - 2.1.1 Paddock selection: key points 2
 - 2.1.2 Soil types 3
 - Soil structure* 3
 - Soil pH* 5
 - Hostile soils* 5
 - Evenness of soil surface* 5
 - 2.1.3 Paddock selection to reduce disease risk 5
 - 2.1.4 Paddock selection based on weed status 6
- 2.2 Paddock history and rotation 6
 - 2.2.1 Rotational benefits of pulses 7

Yield gains in subsequent crops.....	7
Financial benefits over the rotation.....	8
Managing weeds including herbicide-resistant weeds.....	8
Nitrogen fixation.....	8
Residual water.....	9
Cereal disease management.....	10
Take-all.....	10
Crown rot.....	10
Root-lesion nematode.....	10
Cereal foliar disease.....	11
2.2.2 Rotational disadvantages of pulses.....	11
2.3 Stubble and summer weed management.....	11
2.3.1 Stubble management.....	12
2.3.2 Wide rows with retained stubble.....	13
2.4 Herbicide residue management.....	15
2.4.1 Management of SU residues in faba bean.....	15
2.4.2 Management of 'IMI' residues in faba bean.....	15
2.4.3 Management of triazine residues in faba bean.....	16
2.4.4 Management of Group I foliar herbicide residues.....	17
2.4.5 Testing for herbicide carryover.....	17
2.5 Seedbed requirements.....	18
2.6 Irrigation layout and planning.....	19
2.6.1 Paddocks and irrigation layout.....	19
2.6.2 Sowing irrigated faba bean.....	19
2.6.3 Irrigated faba bean crop management.....	20
2.6.4 Irrigation management.....	20
2.7 Yields and yield targets.....	22
2.7.1 Seasonal outlook.....	22
<i>The Break newsletter (Victoria)</i>	22
<i>Understanding weather and climate drivers</i>	22
<i>CliMate</i>	22
<i>Bureau of Meteorology</i>	22
<i>HowWet?</i>	23
2.7.2 Stored soil moisture.....	23
<i>Measure stored soil moisture</i>	23
<i>Plant-available water capacity</i>	23
2.7.3 Water use efficiency.....	24
2.7.4 Setting target yields.....	24
<i>French-Schultz model</i>	24
<i>APSIM</i>	26
2.8 Nematode status.....	26
2.9 Post-harvest grazing of faba bean crops.....	27
2.9.1 Nutritional value of faba bean.....	27

2.9.2	Introducing livestock to faba bean stubble.....	27
2.9.3	Calculating grain residues	28
2.9.4	Withholding periods and export slaughter intervals.....	28
3	Pre-planting	
	Key points.....	1
3.1	Bean types.....	2
3.1.1	Faba bean types.....	2
3.1.2	Broad bean types.....	2
3.2	Variety selection	3
3.2.1	Introducing a new variety	3
3.3	Area of adaption.....	4
3.4	Variety performance and yield.....	5
3.5	NVT apps for comparing varieties	6
3.5.1	Yield app	6
3.5.2	Disease app.....	6
3.6	Quality traits	7
3.7	Southern faba bean varieties.....	8
3.7.1	Fiesta VF.....	8
3.7.2	Farah [Ⓛ]	9
3.7.3	Nura [Ⓛ]	10
3.7.4	PBA Rana [Ⓛ]	11
3.7.5	PBA Samira [Ⓛ]	12
3.7.6	PBA Zahra [Ⓛ]	13
3.8	Southern broad bean varieties	14
3.8.1	Aquadulce	14
3.8.2	PBA Kareema [Ⓛ]	15
3.9	Faba bean variety seed availability.....	16
3.10	Seed quality.....	16
3.10.1	Sowing grower-retained seed	17
3.10.2	Seed storage.....	18
3.11	Seed testing	18
3.11.1	Germination testing	18
	<i>Doing your own germination test</i>	<i>18</i>
	<i>Vigour testing</i>	<i>19</i>
	<i>Accelerated ageing vigour test.....</i>	<i>20</i>
	<i>Conductivity vigour test.....</i>	<i>20</i>
	<i>Cool germination and cold tests.....</i>	<i>20</i>
	<i>Tetrazolium test as a vigour test.....</i>	<i>20</i>
	<i>Other vigour tests.....</i>	<i>20</i>
3.11.2	Weed-contamination testing.....	21
3.11.3	Disease testing and major pathogens identified in seed tests	21

3.1.4 Agencies offering seed testing	21
4 Planting	
Key points.....	1
4.1 Time of sowing.....	2
4.1.1 Optimal time of sowing in southern Australia.....	2
4.1.2 Sowing too early.....	4
4.1.3 Sowing too late.....	5
4.1.4 Disease risk with early sowing	5
4.1.5 Early weed control v. early sowing.....	6
4.1.6 Variety and time of sowing interaction.....	6
4.1.7 Low-rainfall-zone time of sowing.....	6
4.1.8 Medium-rainfall-zone time of sowing.....	7
4.1.9 High-rainfall-zone time of sowing.....	9
4.1.10 Spring sowing in the high-rainfall zone.....	13
4.2 Sowing rates and plant density	13
4.2.1 Recommended sowing rates and plant density	13
4.2.2 Calculating sowing rate.....	15
<i>Sowing rate calculation.....</i>	<i>16</i>
4.2.3 Plant density x time of sowing interaction.....	16
4.2.4 Plant density x row spacing interaction	18
4.2.5 Plant density x disease interaction.....	18
4.2.6 Plant density effect on ease of harvest.....	18
4.3 Row spacing	19
4.3.1 Range of row spacing.....	19
4.3.2 Calibration of seeder with wide rows	19
4.3.3 Time of sowing x row spacing.....	19
4.4 Inoculation.....	20
4.4.1 Rhizobia and nitrogen fixation.....	20
4.4.2 Inoculants for faba bean	20
4.4.3 Inoculation in practice.....	21
4.4.4 Types of inoculant.....	22
4.4.5 Storing inoculants	22
4.4.6 Inoculation methods.....	22
<i>Peat inoculants.....</i>	<i>23</i>
<i>Freeze-dried inoculants.....</i>	<i>23</i>
<i>Granular inoculants</i>	<i>23</i>
4.5 Inoculant compatibility with pesticides.....	24
4.6 Check for nodulation	24
4.6.1 Sampling and processing	24
4.6.2 Nodule number and distribution.....	24

4.6.3 Nodule appearance.....	25
4.7 Seed treatments	26
4.8 Sowing depth	26
4.8.1 Recommended sowing depth.....	26
4.8.2 Deep sowing	26
4.8.3 Preventing crop damage from herbicides by sowing depth.....	26
4.9 Sowing equipment.....	27
4.9.1 Modifying seeders	27
4.9.2 Air seeders.....	27
4.9.3 Combines	28
4.9.4 Seeder and tyne comparisons	28
<i>Handling faba bean seed</i>	<i>30</i>
4.10 Rolling.....	30
4.11 Dry sowing.....	31
4.11.1 Avoiding nodulation failure when dry sowing.....	31
4.12 Irrigation	32
5 Plant growth and physiology	
Key points.....	1
5.1 Developmental stages.....	2
5.1.1 Germination and emergence.....	3
5.1.2 Vegetative phase	4
5.1.3 Reproductive phase	5
<i>Flower development.....</i>	<i>5</i>
<i>Pod and seed development.....</i>	<i>6</i>
5.1.4 Pod and stem senescence	8
5.2 Factors affecting development.....	8
5.2.1 Thermal time	9
<i>Thermal time effect on vegetative phase.....</i>	<i>9</i>
<i>Thermal time effect on reproductive phase.....</i>	<i>9</i>
5.2.2 Daylength.....	10
5.2.3 Vernalisation.....	10
5.3 Nodulation	11
5.3.1 Temperature effects on nodulation.....	12
5.3.2 Mineral nitrogen effects on nodulation	12
5.3.3 Waterlogging effects on nodulation.....	12
5.4 Pollination	12
5.4.1 Pollination efficiency	12
5.4.2 Bee activity	14
5.4.3 Hive management.....	14
5.4.4 Pesticide sprays.....	17

5.5 Effect of environment on yield components18

- 5.5.1 Low temperature 18
- 5.5.2 Frost..... 19
- 5.5.3 High temperature and wind 20
- 5.5.4 Drought 23
- 5.5.5 Low light 23
- 5.5.6 Humidity..... 24
- 5.5.7 Waterlogging..... 24
- 5.5.8 Disease..... 24
- 5.5.9 Agronomic factors..... 24

5.6 Genetic variation25

- 5.6.1 Varietal differences 25
- 5.6.2 Breeding determinate varieties..... 25

6 Nutrition and fertiliser

Key points..... 1

6.1 Declining soil fertility 2

6.2 Nutrient requirements and fertiliser recommendations 2

- 6.2.1 Nutrient removal..... 3
- 6.2.2 Nutrient budgeting 5
- 6.2.3 Acid fertilisers reduce nodulation..... 6

6.3 Soil testing 6

- 6.3.1 Critical values and ranges 7

6.4 Plant tissue testing..... 9

- 6.4.1 Critical nutrient levels 9

6.5 Nutrient disorders10

- 6.5.1 Diagnosing nutrient deficiency..... 10
- 6.5.2 Nutrient toxicity..... 12
 - Soil acidity* 13
 - Manganese toxicity*..... 15
 - Aluminium toxicity*..... 15
 - Boron toxicity, salinity and sodicity*..... 16

6.6 Nitrogen17

- 6.6.1 Nutrition effects on following crop17
- 6.6.2 Nitrogen fertiliser 18
- 6.6.3 Nitrogen deficiency symptoms..... 19
 - Nodulation failure*..... 19

6.7 Phosphorus.....22

- 6.7.1 Occurrence of phosphorus deficiency..... 22
- 6.7.2 Phosphorus deficiency symptoms..... 22
- 6.7.3 Phosphorus management 23

6.7.4	Fertiliser placement and fertiliser toxicity.....	25
6.7.5	AMF: arbuscular mycorrhizae fungi effects on phosphorus and zinc.....	25
6.8	Potassium	26
6.8.1	Occurrence of potassium deficiency	26
6.8.2	Potassium deficiency symptoms.....	26
6.8.3	Potassium management.....	29
6.9	Sulfur.....	30
6.9.1	Occurrence of sulfur deficiency	30
6.9.2	Sulfur deficiency symptoms	30
6.9.3	Sulfur management	31
6.10	Micronutrients (trace elements)	31
6.10.1	Micronutrient application	32
6.10.2	Zinc	33
	<i>Zinc deficiency symptoms</i>	<i>33</i>
	<i>Zinc management.....</i>	<i>35</i>
	<i>Solid zinc fertiliser treatments.....</i>	<i>35</i>
	<i>Foliar zinc sprays.....</i>	<i>36</i>
	<i>Zinc seed treatments.....</i>	<i>36</i>
6.10.3	Iron	37
	<i>Occurrence of iron deficiency.....</i>	<i>37</i>
	<i>Iron deficiency symptoms.....</i>	<i>37</i>
	<i>Iron management.....</i>	<i>38</i>
6.10.4	Manganese deficiency.....	39
	<i>Occurrence of manganese deficiency.....</i>	<i>39</i>
	<i>Manganese deficiency symptoms.....</i>	<i>39</i>
	<i>Manganese management.....</i>	<i>40</i>
6.10.5	Copper	41
	<i>Occurrence of copper deficiency.....</i>	<i>41</i>
	<i>Copper deficiency symptoms</i>	<i>41</i>
	<i>Management.....</i>	<i>43</i>
6.10.6	Molybdenum	43
	<i>Occurrence of molybdenum deficiency.....</i>	<i>43</i>
	<i>Molybdenum deficiency symptoms.....</i>	<i>43</i>
	<i>Molybdenum management.....</i>	<i>43</i>
6.10.7	Cobalt.....	44
6.10.8	Boron.....	44
	<i>Occurrence of boron deficiency.....</i>	<i>44</i>
	<i>Boron deficiency symptoms</i>	<i>44</i>
	<i>Management of boron deficiency.....</i>	<i>45</i>
7	Weed control	
	Key points.....	1
7.1	Impact/cost of weeds	2
7.2	Key points for managing weeds in faba bean	3

7.3	Using pulse crops for strategic weed control	3
7.3.1	Grass weeds.....	4
7.3.2	Broadleaf weeds	4
7.4	Integrated weed management (IWM)	5
7.4.1	Strategy – paddock choice and crop rotation.....	5
7.4.2	Good agronomic practice	5
7.4.3	Pre-plant weed control	5
7.4.4	In-crop weed control	6
7.4.5	Selective grazing.....	6
7.4.6	Managing weeds at harvest.....	7
7.4.7	Alternatives to harvesting the crop.....	8
7.5	Decision-support tools	9
7.6	Free alert services for weeds	9
	<i>National</i>	9
	<i>Victoria</i>	9
7.7	Using herbicides	10
7.7.1	Residual and non-residual herbicides	10
7.7.2	Post-emergent and pre-emergent	10
7.7.3	Current minor use permits (MUP)	11
7.8	Herbicide-resistant weeds	11
	There are four main factors that influence the evolution of resistance:	13
	<i>1. The intensity of selection pressure.</i>	13
	<i>2. The frequency of use of one herbicide or mode of action group.</i>	13
	<i>3. The frequency of resistance present in untreated populations.</i>	13
	<i>4. The biology and density of the weed.</i>	13
7.8.1	Glyphosate (Group M).....	13
7.8.2	Paraquat (Group L).....	13
7.8.3	Other herbicides.....	14
	<i>Annual ryegrass is highly competitive against faba bean.</i>	14
7.8.4	Managing herbicide resistance	14
7.8.5	Herbicide-resistance testing	15
7.9	Risk of herbicide damage	16
7.9.1	Herbicide residues	16
7.9.2	Drift	17
7.9.3	Spray tank contamination with sulfonylurea herbicides.....	17
7.9.4	Minimising damage from pre- and post-emergent herbicides	17
7.9.5	Symptoms of herbicide damage.....	18

Group A	18
Group B.....	19
Group C.....	19
Group D.....	20
Group F.....	20
Group G.....	21
Group I.....	21
Group J.....	22
Group L.....	23
Group M.....	24
7.9.6 Herbicide tolerance.....	25
7.9.7 Breeding for improved tolerance.....	26
7.10 Knockdown herbicides.....	26
7.11 Pre-emergent herbicides	27
7.11.1 Imazethapyr (Group B).....	27
7.11.2 Trifluralin and pendimethalin (Group D)	28
7.11.3 Triallate (Group J)	28
7.11.4 Cyanazine (Group C)	28
7.11.5 Simazine (Group C).....	28
7.11.6 Terbutylazine (Group C)	28
7.11.7 Metribuzin (Group C).....	28
7.11.8 Diuron (Group C)	28
7.12 Post-emergent herbicides	29
7.12.1 Broadleaf herbicides (Group B).....	29
7.12.2 Grass herbicides (Group A)	30
7.13 Directed sprays.....	30
7.14 Crop-topping	31
7.15 Selective sprayer technology.....	31
7.15.1 Permits for herbicides using weed detectors.....	32
7.16 Exotic weeds of faba bean	33
7.16.1 Branched broomrape (<i>Orobanche ramosa</i>)	33
<i>Description and life cycle</i>	33
8 Pest management	
Key points.....	1
8.1 Integrated pest management (IPM)	2
8.1.1 IPM definition	2
8.1.2 Problems with pesticides.....	2
8.1.3 IPM, organics and biological control.....	2
8.1.4 Soft v. hard pesticides	2
8.1.5 IPM process	3
8.1.6 IPM system.....	4

Acceptable pest levels.....	4
Preventative cultural practices	4
Monitoring faba bean crops.....	4
Biological and environmental control	5
Responsible chemical use	6
8.1.7 Monitoring methods	6
Sweep net monitoring.....	6
Crop inspection.....	6
Quadrats	7
Tiles, hessian bags and slug traps.....	7
8.2 Identifying pests	7
8.2.1 Correct identification of insect species.....	7
Sending insect samples for diagnostics.....	7
8.2.2 Insect ID: The Ute Guide	8
8.2.3 GrowNotes™ Alerts.....	8
8.3 Key pests of faba bean.....	9
8.3.1 <i>Helicoverpa</i> species: native budworm and corn earworm (<i>Helicoverpa punctigera</i> and <i>H. armigera</i>).....	9
Distribution of <i>Helicoverpa</i> spp.....	9
Pest status of <i>Helicoverpa</i> spp.....	10
Identification of <i>Helicoverpa</i> spp. eggs and larvae.....	10
Distinguishing <i>Helicoverpa</i> spp. from other caterpillars.....	12
Identification of <i>Helicoverpa</i> spp. moths.....	13
Life cycle of <i>Helicoverpa</i> spp.....	14
Diapause in <i>Helicoverpa</i> spp.....	14
Damage by <i>Helicoverpa</i> spp.....	15
Monitoring <i>Helicoverpa</i> spp. larvae.....	16
Monitoring <i>Helicoverpa punctigera</i> (native budworm) moth flights.....	18
Control thresholds for <i>Helicoverpa</i> spp.....	19
<i>Helicoverpa punctigera</i> (native budworm) control	20
<i>Helicoverpa armigera</i> control	20
8.3.2 Snails	21
White snails or round snails (<i>Ceruella virgata</i> and <i>Theba pisana</i>).....	21
Conical snails or pointed snails or (<i>Cochlicella acuta</i> and <i>Cochlicella barbara</i>).....	22
Damage by snails	23
Life cycle of snails.....	24
Monitoring snails	24
Snail control	25
8.3.3 Slugs (<i>Deroceras reticulatum</i>, <i>Milax gagates</i> and others)	26
Slug species identification	26
Damage by slugs	27
Life cycle of slugs.....	27
Monitoring of slugs	28
Slug control	28
8.3.4 Aphids.....	30

<i>Aphids and virus transmission</i>	30
<i>Cowpea aphid (Aphis craccivora)</i>	31
<i>Bluegreen aphid (Acyrtosiphon kondoi)</i>	32
<i>Monitoring aphids</i>	33
<i>Aphid control for viruses</i>	34
<i>Aphid control for direct feeding damage</i>	35
8.4 Other pests of faba bean	36
8.4.1 Redlegged earth mite (<i>Halotydeus destructor</i>).....	36
<i>RLEM identification</i>	36
<i>RLEM damage</i>	37
<i>RLEM life cycle</i>	38
<i>RLEM monitoring</i>	38
<i>RLEM control and insecticide resistance management</i>	38
<i>Chemical control of RLEM</i>	38
<i>Biological control of RLEM</i>	39
<i>Cultural control of RLEM</i>	39
8.4.2 Lucerne flea (<i>Sminthurus viridis</i>).....	40
<i>Lucerne flea identification</i>	40
<i>Lucerne flea damage</i>	40
<i>Lucerne flea life cycle</i>	41
<i>Monitoring</i>	41
<i>Chemical control of lucerne flea</i>	41
<i>Biological and cultural control of lucerne flea</i>	42
8.4.3 Blue oat mite (<i>Penthaleus</i> spp.).....	43
<i>Blue oat mite identification</i>	43
<i>Blue oat mite damage</i>	43
<i>Blue oat mite life cycle</i>	43
<i>Blue oat mite monitoring</i>	43
<i>Chemical control</i>	43
<i>Biological & cultural control</i>	44
8.4.4 Australian plague locust (<i>Chortoicetes terminifera</i>).....	45
<i>Australian plague locust identification</i>	45
<i>Australian plague locust damage</i>	45
<i>Australian plague locust life cycle</i>	45
<i>Control</i>	46
8.5 Occasional pests of faba bean	46
8.5.1 Cutworms: Common cutworm or Bogong moth, black cutworm, brown or pink cutworm and herringbone cutworm (<i>Agrotis infusa</i>, <i>Agrotis ipsilon</i>, <i>Agrotis munda</i> and other <i>Agrotis</i> species).....	46
<i>Cutworm identification and life cycle</i>	46
<i>Cutworm monitoring, damage and control</i>	46
8.5.2 Balaustium mite (<i>Balaustium medicagoense</i>).....	47

	<i>Balaustium</i> mite identification and life cycle	47
	<i>Balaustium</i> mite monitoring, damage and control.....	47
8.5.3	Clover mite or Bryobia mite (<i>Bryobia</i> spp.).....	47
	<i>Bryobia</i> mite identification and life cycle	47
	<i>Bryobia</i> mite monitoring, damage and control	47
8.5.4	Other occasional pests of faba bean.....	48
	Earwigs.....	48
	<i>Mandalotus</i> weevil	48
	Onion thrips, plague thrips, & western flower thrips	48
	Brown pasture looper	49
	Looper caterpillar	49
	Bronze field beetle	49
	False wireworm	49
	Onion seedling maggot	49
8.6	Exotic faba bean insects – biosecurity threats.....	50
8.6.1	Exotic seed beetles/bruchids (<i>Coleoptera</i> : Family: <i>Chrysomelidae</i> , sub-family: <i>Bruchinae</i>).....	50
8.6.2	Exotic leafminers (<i>Diptera</i> : family <i>Agromyzidae</i>).....	50
8.7	Beneficial species.....	50
	Beetles.....	51
	Bugs.....	51
	Flies.....	51
	Lacewings.....	51
	Mites	51
	Caterpillar wasps.....	52
	Aphid wasps	52
	Spiders.....	52
	Insect diseases – viral & fungal	52
8.8	Registered insecticides, commonly used	53
8.8.1	Comments on insecticides	54
9	Diseases	
	Key points.....	1
9.1	Impact and cost of diseases.....	2
9.2	Integrated pest management (IPM) strategies	3
9.3	Select a resistant variety	5
9.4	Paddock selection	6
	Rotational crops and weeds.....	6
	Herbicide interaction.....	8
9.5	Good hygiene	9
9.6	Use clean seed	10
9.6.1	Seed dressings.....	10
9.7	Sowing.....	11
9.7.1	Sowing date.....	11

9.7.2	Sowing rate and row spacing	11
9.8	Risk assessment	12
9.9	Symptom sorter	12
9.10	Crop monitoring.....	14
9.10.1	Ascochyta blight.....	14
9.10.2	Chocolate spot.....	14
9.10.3	Cercospora leaf spot.....	15
9.10.4	Rust.....	15
9.11	Free alert services for diseases.....	16
9.12	Using fungicides.....	17
9.12.1	Registered products	17
9.12.2	Current minor use permits (MUP)	19
9.12.3	The critical periods for fungicide use	19
	<i>First critical period.....</i>	<i>20</i>
	<i>Second critical period.....</i>	<i>20</i>
	<i>Third critical period.....</i>	<i>21</i>
9.13	Correctly identifying diseases	22
9.13.1	Diagnostic skills.....	22
9.13.2	Sending samples for disease diagnosis	23
	<i>Selection of specimens.....</i>	<i>23</i>
	<i>Preservation.....</i>	<i>23</i>
	<i>Packaging.....</i>	<i>23</i>
	<i>Labelling.....</i>	<i>24</i>
	<i>Dispatch</i>	<i>24</i>
	<i>Relevant contacts.....</i>	<i>25</i>
9.14	Ascochyta blight (AB) (<i>Ascochyta fabae</i>).....	26
9.14.1	Symptoms	26
9.14.2	Economic importance	28
9.14.3	Disease cycle	29
9.14.4	Management options	30
9.15	Chocolate spot (<i>Botrytis fabae</i>)	31
9.15.1	Symptoms	31
9.15.2	Economic importance	34
9.15.3	Disease cycle	34
9.15.4	Management options.....	35
9.16	Rust (<i>Uromyces viciae-fabae</i>)	38
9.16.1	Symptoms	38
9.16.2	Economic importance	39
9.16.3	Disease cycle	39
9.16.4	Management options	39
9.17	Cercospora leaf spot (<i>Cercospora zonata</i>).....	40

9.17.1 Symptoms	40
9.17.2 Economic importance	41
9.17.3 Disease cycle	41
9.17.4 Management options	41
9.18 Alternaria (<i>Alternaria alternata</i>)	42
9.18.1 Symptoms	42
9.18.2 Economic importance	42
9.18.3 Disease cycle	42
9.18.4 Management options	42
9.19 Sclerotinia stem rot (<i>Sclerotinia trifoliorum</i> var. <i>fabae</i>, <i>S. sclerotiorum</i>, <i>S. minor</i>)	43
9.19.1 Symptoms	43
9.19.2 Economic importance	43
9.19.3 Disease cycle	43
9.19.4 Control	43
9.20 Botrytis grey mould (BGM) (<i>Botrytis cinerea</i>)	44
9.20.1 Symptoms	44
9.20.2 Economic importance	44
9.20.3 Disease cycle	44
9.20.4 Management options	44
9.21 Aphanomyces root rot (<i>Aphanomyces euteiches</i> f.sp. <i>phaseoli</i>)	45
9.21.1 Symptoms	45
9.21.2 Economic importance	45
9.21.3 Disease cycle	45
9.21.4 Management options	46
9.22 Other root rots, including Phoma blight and damping-off (<i>Fusarium</i>, <i>Rhizoctonia</i>, <i>Pythium</i> spp. and <i>Phoma medicaginis</i> var <i>pinodella</i>)	46
9.22.1 Symptoms	46
9.22.2 Economic importance	46
9.22.3 Disease cycle	46
9.22.4 Management options	47
9.23 Stemphylium blight (<i>Stemphylium botryosum</i>)	47
9.23.1 Symptoms	47
9.23.2 Economic importance	47
9.23.3 Disease cycle	47
9.23.4 Management options	47
9.24 Stem nematode (<i>Ditylenchus dipsaci</i>)	48
9.24.1 Symptoms	48
9.24.2 Economic importance	48
9.24.3 Life cycle	49
9.24.4 Management options	49

9.25 Root-lesion nematodes (RLN) (*Pratylenchus neglectus*, *P. thornei* and other *Pratylenchus* spp)..... 49

 9.25.1 Symptoms 49

 9.25.2 Economic importance 49

 9.25.3 Life cycle 50

 9.25.4 Management options 50

9.26 Viruses 51

 9.26.1 Viruses in pulses 51

 9.26.2 How viruses spread..... 53

Persistent transmission..... 53

Non-persistent transmission 53

 9.26.3 Symptoms 54

 9.26.4 Economic importance 59

 9.26.5 Disease cycle 61

 9.26.6 Management options 61

 9.26.7 Virus testing 63

9.27 Exotic diseases with potential to impact on Australian crops 64

 9.27.1 Downy mildew (*Peronospora viciae*-fabae)..... 64

 9.27.2 Fusarium wilt (*Fusarium avenaceum* f. sp. *fabae* and *F. oxysporum* f. sp. *fabae*)..... 65

 9.27.3 Red clover vein mosaic virus (carlavirus) 65

10 Plant growth regulators and canopy management

Key points..... 1

10.1 Canopy management in faba bean and broad bean..... 2

10.2 Plant growth regulators..... 3

 10.2.1 Survey of the use of PGRs in Australia..... 3

 10.2.2 Plant growth regulator trials in faba bean and broad bean..... 3

11 Pre-harvest treatments

Key points..... 1

11.1 Purpose 2

11.2 Correct timing based on seed and pod development 3

11.3 Desiccation 4

11.4 Windrowing 5

11.5 Crop-topping 8

11.6 Chemical products registered for use in faba bean 11

12 Harvest

Key points..... 1

12.1 Harvesting for seed crops 2

12.2 The impact of delayed harvest on profitability..... 2

 12.2.1 Yield losses 3

12.2.2 Quality losses.....	3
<i>Marketing</i>	3
<i>Cracking</i>	4
<i>Darkening</i>	4
<i>Pests and diseases</i>	4
12.2.3 Missed marketing opportunities	6
12.2.4 A more difficult harvest.....	6
12.3 Plan ahead for successful early harvest	6
<i>Sowing</i>	6
<i>In-crop management</i>	7
<i>Harvest management</i>	7
12.4 Paddock preparation	7
12.5 Moisture content and temperature.....	7
12.6 Harvester set-up.....	8
12.7 Harvesting windrows.....	10
12.8 Lodged crops	10
12.9 Managing snails.....	10
12.9.1 Plan ahead for harvesting crops with snails	10
12.9.2 Limiting intake of snails at harvest:	11
12.9.3 Post-harvest grain cleaning.....	12
12.9.4 Post-harvest paddock management for snails.....	12
12.10 Assessing harvest loss	13
12.11 Harvest fire risk.....	14
12.12 Handling and moving faba bean	14
12.13 Receival standards.....	15
12.14 Grain Delivery	16
12.14.1 Faba bean	16
<i>Delivery locations</i>	16
12.14.2 Broad bean and other faba bean classes	16
13 Storage	
Key points.....	1
13.1 Handling faba and broad bean.....	2
13.2 Grain cleaning.....	3
13.3 Comparing storage options.....	3
13.4 Silos.....	5
<i>Calculating silo capacity</i>	5
13.5 Grain quality	5
13.6 Moisture content and temperature.....	6
13.7 Cooling and drying pulses.....	7
13.8 Aeration cooling	8
13.9 Aeration drying	9

13.10 Heated air drying..... 9

13.11 Preventing moisture migration10

 13.11.1 Grain 10

 13.11.2 Insects 10

 13.11.3 Condensation 10

 13.11.4 Leaks 10

13.12 Pulse quality risks with grain bags11

13.13 Insect pests in storage12

13.14 Farm and grain hygiene13

13.15 Fumigation in sealed silos14

13.16 Using phosphine15

13.17 Alternative fumigants for pulses17

14 Environmental issues

Key points..... 1

14.1 Abiotic stress..... 2

 14.1.1 Drought and heat stress.....2

 14.1.2 Waterlogging2

 14.1.3 Frost.....2

 14.1.4 Lack of sunlight.....2

14.2 Improving the farm resource base..... 2

 14.2.1 Environmental issues plan..... 3

 14.2.2 Industry issues 3

14.3 Soil erosion..... 3

 14.3.1 Reducing risk of soil erosion..... 3

Retaining cereal stubbles3

Faba bean stubble management.....3

Effect of soil type on erosion risk4

Agronomic management to reduce erosion risk.....4

14.4 Water 4

14.5 Nutrients 4

 14.5.1 Nutrient losses4

 14.5.2 Nitrogen fixation and changing atmosphere..... 5

14.6 Biology..... 5

 14.6.1 Biosecurity5

 14.6.2 Integrated pest management5

 14.6.3 Integrated weed management.....5

 14.6.4 Responsible pesticide stewardship5

Legal considerations.....5

National residue survey.....6

Prevention of spray drift.....7

15 Marketing

15.1 Selling principles 1

 15.1.1 Be prepared..... 2

 1. *When to sell*..... 2

 2. *How to sell?*..... 2

15.2 Establish the business risk profile (when to sell) 3

 15.2.1 Production risk profile of the farm 4

 15.2.2 Farm costs in their entirety, variable and fixed costs
 (establishing a target price) 4

 15.2.3 Income requirements 4

15.2 When to sell revised 5

15.3 Ensuring access to markets..... 5

 15.3.1 Storage and logistics..... 6

 15.3.2 Cost of carrying grain..... 7

15.4 Executing tonnes into cash 8

 15.4.1 Set up the tool box 8

References: 8

 15.4.2 How to sell for cash..... 8

 15.4.3 Counterparty risk..... 11

 15.4.4 Relative values 11

 15.4.5 Contract allocation..... 12

 15.4.6 Read market signals 12

15.4 Sales execution revised 12

15.5 Southern faba bean – market dynamics and execution 13

 15.5.1 Price determinants for southern faba beans 13

 15.5.2 Ensuring market access for southern faba bean 14

 15.5.3 Executing tonnes into cash for southern faba bean 15

15.6 Marketing plan 16
